---

### PROFESSIONAL SUMMARY

Computer Science graduate with hands-on experience in AWS, Microsoft Azure, Linux, networking, cloud infrastructure, and automation. Skilled in deploying and troubleshooting cloud environments, configuring virtual networks, compute resources, load balancing, security controls, and monitoring solutions. Practical exposure to AWS EC2, VPC, IAM, S3, ELB, Auto Scaling, Azure VMs, VNet, NSG, Load Balancer, Azure Monitor, ARM Templates and Azure CLI. Strong foundation in Python, SQL and Git. Seeking an entry-level Cloud Engineer, Cloud Support Engineer, or Infrastructure Engineer role.

---

### SKILLS

- **Cloud:** AWS, Microsoft Azure
  - **AWS:** EC2, VPC, IAM, S3, ELB, Auto Scaling, Route 53, CloudWatch, EBS, Security Groups
  - **Azure:** Virtual Machines, VNet, Subnets, NSG, Load Balancer, Storage Account, RBAC, Entra ID, Azure Monitor, Resource Groups
  - **Networking:** TCP/IP, DNS, DHCP, HTTP/HTTPS, SSH, VPN, Routing, Subnetting
  - **Infrastructure & Automation:** ARM Templates, AWS CloudFormation, Azure CLI
  - **Operating Systems:** Linux
  - **Programming:** Python, Java, SQL
  - **Tools:** Git, GitHub, Excel, Power BI
  - **Soft Skill :** Time management, Team work , Strong Communication
- 

### EXPERIENCE

Mar 2025-Present

#### FREELANCE TECHNICAL TRAINING & PRACTICAL EXPOSURE

- Created and delivered hands-on labs covering AWS/Azure, Linux, networking and DevOps fundamentals.
  - Troubleshoot learner environments involving Linux commands, SSH connectivity, networking and cloud resource configuration.
  - Assisted learners in identifying and resolving Linux, networking and cloud configuration issues.
-

## CERTIFICATIONS

- HackerRank Python Certificate
  - AICTE AWS Cloud Virtual Internship
  - NIELIT Machine Learning using Python
  - NASSCOM Generative AI
  - AWS Academy Cloud Certification
- 

## PROJECTS

### Enterprise High Availability Infrastructure on Microsoft Azure

**Technologies:** Azure VM, VNet, NSG, Load Balancer, Storage Account, Azure Monitor, ARM Templates

- Designed and deployed a highly available Azure infrastructure using Virtual Machines and Load Balancer.
- Configured Virtual Network, Subnets, NSGs, and Storage Accounts for secure resource deployment.
- Automated infrastructure deployment using ARM Templates and Azure CLI.
- Monitored infrastructure health and alerts using Azure Monitor.

### Highly Available Web Application on AWS

**Technologies:** EC2, VPC, IAM, S3, ELB, Auto Scaling, Route53, CloudWatch

- Designed a scalable AWS infrastructure with EC2, VPC, and Auto Scaling.
- Configured IAM policies, Security Groups, and Route53 for secure application hosting.
- Implemented Elastic Load Balancer and CloudWatch monitoring.
- Managed storage using Amazon S3.

### Multi-Cloud Infrastructure Automation & Monitoring

**Technologies:** Azure CLI, ARM Templates, Azure Monitor, AWS CloudWatch, Linux, Git

- Automated Azure resource deployment using ARM Templates.
  - Managed Azure resources through Azure CLI.
  - Configured monitoring dashboards and alerts in Azure Monitor and AWS CloudWatch.
  - Performed Linux administration and infrastructure troubleshooting.
-
